

Comfort Collection

Comfort begins at home!

Fibreline Ltd., a UK based company founded in 1982, has become the largest independently owned cushion fillings supplier in the country. With a history of pioneering the use of carded synthetic fibres in upholstery cushions, Fibreline has established a reputation for products with unparalleled innovation, quality, comfort and durability.

Today our cushion range extends from single filling options to multi-layered combinations of fibre, foam, and feathers, ensuring that customers receive the utmost comfort in their seating experience at a price that works for them.

What sets Fibreline apart from other suppliers is their commitment to reliability. Whether it's the quick and accurate production of prototypes or meeting specific delivery instructions, customers can rest easy knowing that Fibreline's experience and professionalism will not let them down. This dedication to customer service is not just empty words for Fibreline, it is the foundation upon which we have built our business.

"As a trade only supplier focused solely on the upholstery sector, Fibreline understands the unique needs and demands of their customers in the industry".

Fibreline recognises the importance of providing prompt and efficient service to their trade partners, ensuring that they can meet the demands of their own customers. With Fibreline as a reliable supplier, trade partners can trust that they will receive high-quality products that will enhance their own offerings.

In addition to our commitment to reliability, Fibreline also prioritises customer satisfaction. We understand that providing excellent products is only part of the equation - exceptional customer service is equally important. From the initial contact to after-sales support, Fibreline strives to

exceed customer expectations at every step. Our team of knowledgeable professionals is always ready to assist with any enquiries or concerns, ensuring that customers feel valued and heard.

Overall, Fibreline Ltd. stands as a leader in the UK's cushion fillings industry due to their unwavering commitment to innovation, comfort, reliability, and customer service. With our extensive experience and dedication to excellence, customers can trust that Fibreline will deliver products that meet their needs and exceed their expectations.

Whether it's for prototype production or meeting specific delivery instructions, Fibreline truly embodies what it means to be a dependable supplier partner.

Helping the planet from the comfort of your own sofa!

Fibreline's dedication to customer satisfaction extends beyond just their products and services. We also recognise the importance of sustainability in our manufacturing processes. By working with our suppliers in the development of eco-friendly materials and implementing energy-efficient practices, Fibreline is committed to reducing their environmental impact. This commitment not only benefits the planet, but also aligns with the values of our customers who are increasingly seeking sustainable options.

Fibreline's commitment to sustainability is evident in their efforts to minimise waste, promote recycling and source renewable energy from their 150kW solar generation system, which was installed several years ago. We actively seek out innovative solutions to reduce our carbon footprint and explore alternative material options that are more eco-friendly.

By choosing Fibreline as your supplier, trade partners can align themselves with a company that shares their values and contributes to a greener future.

Fibreline’s UK coverage

UK manufacturing and upholstery industry only service provider.

Located in the heart of the UK with excellent logistical access to all the major road networks, puts our ability to serve our clients quickly and efficiently at the core of our service.

Keighley in West Yorkshire has been our home since the company conception back in 1982. Since the early days, Fibreline has had a policy of reinvesting in its people, premises and processes. 2024 saw the Keighley site expanding to a total 100,000 sq ft. of production and warehousing space.

-  A team of over 235 employees.
-  Combination of traditional textile skills and the latest CNC/Robotic production processes.
-  Operating 24hrs a day, 5 days a week.
-  Converting in excess of 100 tonnes of foam, fibre and feather per week.
-  Producing fillings for over 5,000 sofas per week.

Fibreline’s logistic fingerprint covers the whole of the UK.

FREE Delivery to regular delivery areas such as Yorkshire, Lancashire, East and West Midlands, and South Wales

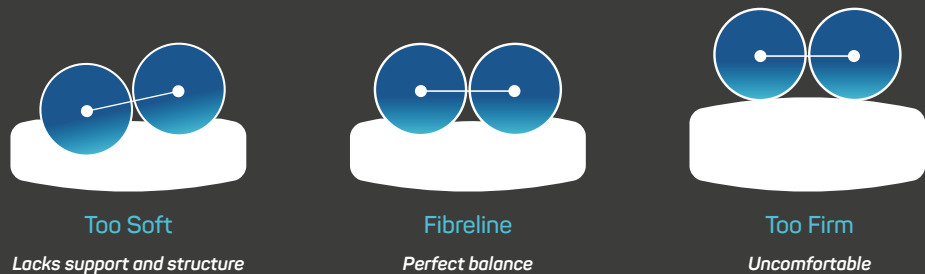

Fibreline comfort cushion fillings appeal to everyone!

Suitable for all shapes, sizes & sitting positions

Fibreline is a pioneering cushion manufacturer with a range of fillings to suit all price points and applications. Standard single filling options to high performance combination fillings, tested and accredited to FIRA Gold certification.

There’s no general industry rating system for cushion fillings, so Fibreline uses a basic system to try and explain the relative look, performance and maintenance requirements.

Grades are based on independent studies and our experience on what makes the upholstery cushions comfortable.

Fibreline’s simple to follow comfort grade system is designed based on cushion resilience over time.

Same comfort that you come to expect from encore but greener for the planet!

Introducing Encore blue's sustainable range of products. Encore cushion performance with sustainability desires at its heart. Working with like-minded supply partners, Fibreline are developing a range of cushions using increasingly sustainable raw materials. Manufactured in our facilities, where 20% of electricity is generated on-site. Products are designed with future recycling in mind, ensuring the potential of a full product life-cycle.

Embrace our environmentally friendly cushion comfort range without compromising on quality or style.

Comforting feeling for you and the planet!

origin

All Origin™ products contain sustainably sourced plant-based polyol such as soy and castor oil as an alternative to petrochemical-based feedstocks.

Castor Oil benefits:

Castor oil is often used in medicine and skincare due to its natural anti-inflammatory, anti-bacterial and anti-fungal qualities.

Soy based polyol benefits:

Combustion Modified Ether (CME) foam products infused with soy oil-based polyols achieve the high standard of fire safety requirements set by the UK and Irish regulators.

orbis

Orbis™ is a new revolutionary collection of sustainable PU foams made from polyols sourced from recycled post-consumer foam mattresses. Orbis™ foam is Europe's first flexible polyurethane (PU) foam made with recycled raw materials.

Featuring Vita Foam Materials

Feathers

All feathers are ethically sourced and are a bi-product of the meat industry. All feathers are washed and treated with steam at 145°C and then dried before use to ensure any bacteria or living micro-organisms are removed.

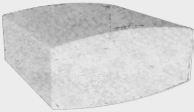

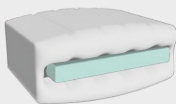

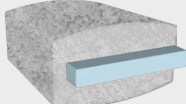

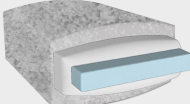

GRS certified polyester fibre is derived from recycled single use plastics such as water bottles, straws, cutlery, food containers and other items are reprocessed through specialist treatments to produce a new polyester staple raw material fibre.

On average one single sofa cushion uses the equivalent of 100 plastic bottles, that's 100 bottles not going to landfill or polluting our oceans.

Additionally, Fibreline are working closely with our supply chain to ensure we provide GRS* certified fabrics where possible and RDS* certified feathers can be sourced. These sustainable initiatives are becoming increasingly important and Fibreline are ready to work with our partners in the introduction of such practices to the market.

* GRS: Global Recycling Standard - RDS: Responsible Down Standard

Polyurethane Foam

All our foam is sourced from recognised and approved suppliers.	Supplier sheets for relevant hardness data on each specific grade option can be provided on request.
All foam products are produced to Fibreline's tight specifications and undergo stringent quality checks at each stage of production.	All CM Foams pass Schedule 1 Part 1 of the BS 5852 regulations using Ignition Source 5 and a FR polyester cover.
Non Branded Combustion Modified Foams	
Fibreline can supply a full range of non branded foam grades for any application in Domestic Upholstered Furniture.	

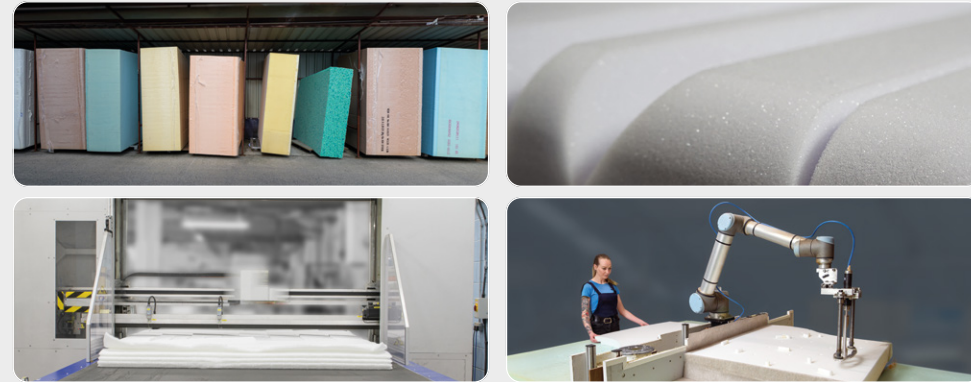

Foam conversion

Foam conversion exclusively focused on the upholstery industry.

At Fibreline, we understand the importance of maintaining focus on our upholstery manufacturing customers. In addition to our extensive cushion range, we are also able to provide all the tacking kit requirements our customers need.

One of the key advantages of our service is our ability to work with our customers electronic design files, to recreate the exact foam cutting at any shape or scale that you require. Whether you have a unique design in mind or need to match an existing piece, we have the capabilities to bring your vision to life.

With our state-of-the-art conversion equipment and specialised precision software, we are able to cut...foam, laminates, fabrics, waddings and insulators. Our production process includes a kit packing stage that allows us to produce over 1000 tacking kits per day.

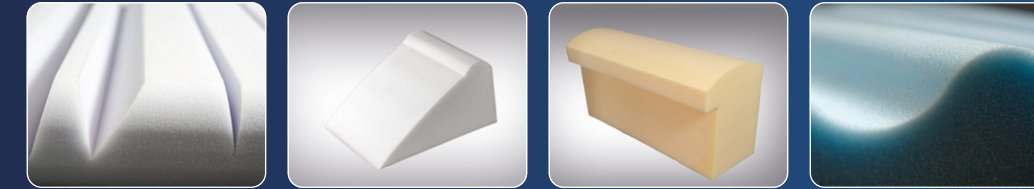

To further assist you in creating the perfect foam cutting solution, our in-house technical engineers are available to discuss your needs and provide guidance. They have extensive knowledge and experience in foam conversion and cutting techniques, and can offer valuable insights to help optimise your design.

With its award winning cushion range and its large upholstery kit manufacturing facilities, Fibreline has the ability and the capacity to cope with growing demand for its products. You can be confident that Fibreline can provide the complete fillings solution when you need them, where you need them. Giving you total comfort in your fillings supply chain.
